When we write an exposition we are trying to persuade our audience. The grade 2-3-4 grade is learning to structure and write expositions using paragraphs to separate our ideas.

I’m going to tell you why everyone should recycle.
Firstly, we need to recycle because all the fish will die in the water if you throw rubbish in the water. We don’t want them to die.
Secondly, we can reuse the bottles for new bottles.
Finally you can make new paper out of old paper.
So that’s why everyone should recycle.
by Lilly and Ella.
Earth Hour

I am going to tell you why Earth Hour is important. Firstly, Earth Hour is important because it makes people think about the Earth. Secondly we need to start to look after the environment so we will have to look after the world. Finally, we need to put rubbish in the bin. So as you can see Earth Hour is important.

By Ronan and Rory

Turn off your lights during Earth Hour to send a clear message about global warming.

Earth Hour

Earth Hour is on the 19/3/2016. Turn your lights off at 8:30pm to 9:30pm to save power and to pass on the message that we need to look after our world. Come down to assembly next week and hear us sing a love song to the Earth.

By Seth.G Josh and Kara.
Love Song To The Earth.

The Love Song To The Earth song is about saving the Earth. It is important to look after the Earth because we only have one of them. In the Youtube clip the animals look happy and the environment looks good as well. We hope you look after the Earth. If you want to hear the song come to assembly next week because Grade 2\3\4 will be singing it. By Quinn and Oscar.

Nude Food: How we can help our wonderful world?

by Xavier and Ryan

If we leave rubbish in the yard it could blow in to the dam and animals could eat the rubbish and die. We also need to keep our playground clean. Nude food means that the environment is healthy and animals can live there. We need to look after the world and animals.

Science

We are tackling a huge unit on sustainability that will continue throughout next term as well. So far we have been exploring recycling and have been looking at waste management around the world. Through the Big Books that we share we have investigated different viewpoints about recycling and have considered the idea that through 40,000 years of Indigenous culture in Australia, waste was never an issue. Learning about sustainability has impacted on our music, science, writing and reading in the classroom. The children are very keen to learn how they can help our precious Earth.
I am going to tell you why everyone should recycle. Firstly, it is good for the environment. If a wrapper gets in a dam or a river or the sea it will pollute the water.

Secondly, if an animal thinks it is food it could eat the wrapper or other kind of rubbish and it could get it stuck around its head and choke on it.

Thirdly, when we throw our rubbish in the bin it goes to a landfill. Instead of beautiful bush it will turn into a dump.

Finally, each person throws at least 300kg of waste from their homes each year. Australian Aboriginals lived here for 40,000 years without creating landfills. We should be able to as well.
So, as you can see, we all need to get better at recycling.
By Riley and Dane

Keep our world safe. We should keep our world safe so animals don’t get hurt. Fish and birds think rubbish is food and eat it and die. We shouldn’t bring wrappers to school and if we do, we should make sure they go in the bin.
By Felicity

Reduce Reuse Recycle
Respond
Reduce. The word means use less but in this sentence it means use less wrappers and rubbish or it could fly away into the ocean and it would be your fault.
Litter or rubbish flying out of your pocket could hurt our environment.
Reuse means don’t throw things out that are big.
You can make anything with it and it could be reused again.
Recycle means put papers in the recycle bin so they can be made into new paper. Other things that can be recycled are cans, bottles and plastic bottles.
If you respond, you do something about it, so tell your friends and let them know. By Indiana & Lincoln Mulley.

Love Song To The Earth
by Mikayla and Montana

You can go on to youtube and watch the clip of Love Song To The Earth and see all the beautiful plants, animals and waterfalls. The love letters in the clip say keep the earth safe because we don’t want the animals to die. We want to keep the environment safe and happy and not angry or sad.
